RESCUE PADDLEBOARD AIRSUPRA

Tabla inflable de rescate acuático diseñada para guardavidas y equipos de rescate

Ligera y con gran capacidad de carga

Diseño ergonómico con gran hidrodinámica

Complemento ideal en las embarcaciones de rescate a motor

Testada por el Grupo de Investigación en Actividades Acuáticas y Socorrismo de la Universidad de Coruña (GIAAS) y Grupo de Investigación Rendimiento y Motricidad en Salvamento y Socorrismo de la Universidad de Vigo (REMOSS).

Nueva tabla inflable de rescate acuático

RESCUE PADDLEBOARD AIRSUPRA

diseñada para guardavidas y equipos de rescate

Esta tabla AIRSUPRA (AIR Stand-Up Paddle de Rescate Acuático) es especialmente diseñada para ser utilizada por los guardavidas y equipos de rescate de playa. Su diseño ergonómico con líneas de sujeción a lo largo de la tabla y especialmente en los extremos, la convierten en instrumento eficaz para el socorrismo acuático.

Fabricada en PVC Dropstitch de alta resistencia, los tejidos se unen entre sí gracias a la tecnología "aerosol", que garantiza mayor unión entre las capas, aportando durabilidad y rigidez suficiente para poder ser utilizada de pie (modo SUP), de rodillas o acostado (Surf).

Estudios realizados por el Grupo de Investigación en Actividades Acuáticas y Socorrismo de la Universidad de Coruña (GIAAS) y Rendimiento y Motricidad en Salvamento y Socorrismo de la Universidad de Vigo (REMOSS), expuestos en distintos Congresos de seguridad, emergencias y socorrismo, resaltan las siguientes ventajas al utilizar la tabla de AIRSUPRA en las distintas labores relacionadas con los Servicios de Socorrismo:

- Ayuda a mantener y mejorar la condición física del guardavidas
- Facilita la labor preventiva y de vigilancia del guardavidas
- Aumenta la velocidad de aproximación al lugar del incidente
- Mejora las técnicas para el control de personas rescatadas conscientes o inconscientes
- Agiliza el traslado acuático de las personas rescatadas hasta la orilla o lugar seguro
- Reduce la contaminación en el entorno marino
- Facilita el mantenimiento y almacenaje de los materiales de rescate
- Incrementa la disponibilidad inmediata de un material para el rescate

Características técnicas

- 335 cm de altura
- 75 cm de largo
- 12 cm de ancho
- 195 litros de volumen
- Peso del equipo completo +/- 13 kg
- Peso de la tabla +/- 7 kg
- Montaje entre 3 y 4 minutos
