# RESCUE PADDLEBOARD AIRSUPRA®

## Tabla inflable de rescate acuático diseñada para guardavidas y equipos de rescate

Testada por el Grupo de Investigación en Actividades Acuáticas y Socorrismo de la Universidad da Coruña (GIAAS) y Grupo de Investigación Rendimiento y Motricidad en Salvamento y Socorrismo de la Universidad de Vigo (REMOSS).

Ligera y con gran capacidad de carga

Diseño ergonómico con gran hidrodinámica

Complemento ideal en las embarcaciones de rescate a motor

**VANGUARD**  
PROFESSIONAL & RESCUE BOATS

## Nueva tabla inflable de rescate acuático

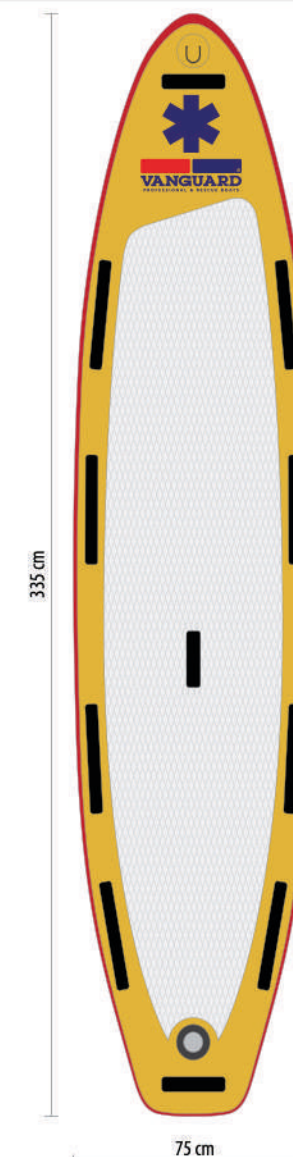

# RESCUE PADDLEBOARD AIRSUPRA®

diseñada para guardavidas y equipos de rescate

**VANGUARD**  
PROFESSIONAL & RESCUE BOATS

Esta tabla **AIRSUPRA** (AIR Stand-Up Paddle de Rescate Acuático) es especialmente diseñada para ser utilizada por los guardavidas y equipos de rescate de playa. Su diseño ergonómico con líneas de sujeción a lo largo de la tabla y especialmente en los extremos, la convierten en instrumento eficaz para el socorrismo acuático.

Fabricada en PVC Dropstitch de alta resistencia, los tejidos se unen entre sí gracias a la tecnología "aerosol", que garantiza mayor unión entre las capas, aportando durabilidad y rigidez suficiente para poder ser utilizada de pie (modo SUP), de rodillas o acostado (Surf).

Estudios realizados por el **Grupo de Investigación en Actividades Acuáticas y Socorrismo de la Universidad da Coruña (GIAAS)** y **Rendimiento y Motricidad en Salvamento y Socorrismo de la Universidad de Vigo (REMOSS)**, expuestos en distintos Congresos de seguridad, emergencias y socorrismo, resaltan las siguientes ventajas al utilizar la tabla de **AIRSUPRA** en las distintas labores relacionadas con los Servicios de Socorrismo:

- Ayuda a mantener y mejorar la condición física del guardavidas
- Facilita la labor preventiva y de vigilancia del guardavidas
- Aumenta la velocidad de aproximación al lugar del incidente
- Mejora las técnicas para el control de personas rescatadas conscientes o inconscientes
- Agiliza el traslado acuático de las personas rescatadas hasta la orilla o lugar seguro
- Reduce la contaminación en el entorno marino
- Facilita el mantenimiento y almacenaje de los materiales de rescate
- Incrementa la disponibilidad inmediata de un material para el rescate

### Características técnicas

- 335 cm de altura
- 75 cm de largo
- 12 cm de ancho
- 195 litros de volumen
- Peso del equipo completo +/- 13 kg
- Peso de la tabla +/- 7 kg
- Montaje entre 3 y 4 minutos

### ¿QUÉ SON LAS TABLAS DE SURF EPOXY?

Las tablas de surf epoxy son aquellas que poseen una estructura interna y exterior igual que cualquier otra de poliéster, pero se diferencia en un detalle puntual de su fabricación, estas tablas se encuentran hechas de foam de poliestireno y resina de epoxy, a diferencia de las de poliéster que sólo cuentan con foam simple. Este tipo de construcción es la más reciente del mercado y lo mejor es que se mantiene en pleno desarrollo, por lo que podremos ver mejoras en sus diseños con el correr de los años.

### CALIDAD DE LA TABLA

Nuestro proceso de fabricación de alta calidad asegura que usted está comprando una tabla sin imperfecciones.

### WARNINGS DE LA TABLA

Mantenga la tabla fuera del sol directo y del calor extremo. Siempre que sea posible, cuando no esté surfando, guárdela en un lugar fresco y seco, y protéjala con una funda de protección solar. No deje la tabla en el coche en un día caluroso. \*Su tabla es frágil. Trate la tabla con cuidado y evite las piedras y los objetos afilados que puedan dañarla, no la flexione en exceso, ya que podría arrugarse, todas las abolladuras deben arreglarse lo antes posible.

### SEGURIDAD

Surfea siempre dentro de tus limitaciones, el océano puede ser peligroso, tu tabla no debe ser considerada como un dispositivo salvavidas y no debe sustituir la habilidad para surfear o nadar, surfea con una correa y respeta a los demás surfistas, ten cuidado con las aletas afiladas de las tablas.
